

# VHA-IHS Memorandum of Understanding

The American Indian and Alaska Native (AI/AN) population experiences health and other disparities that disproportionately affect their quality of life. AI/AN Veterans have an average life expectancy that is five and a half years shorter than the general U.S. population. They are more likely than Veterans of other races or ethnicities to experience social and economic difficulties that may impact their health or wellness, such as lower income, lower education levels, and higher unemployment.<sup>1</sup>

To maximize resources and deliver an integrated approach that supports the health and well-being of the nearly 145,000 AI/AN Veterans living in the United States,<sup>2</sup> the Department of Health and Human Services' Indian Health Service (IHS) and the Veterans Health Administration (VHA) signed a Memorandum of Understanding (MOU) in 2010.

The MOU leadership team comprises senior executives from the VA Office of Tribal Government Relations, VHA Office of Tribal Health, VHA Office of Rural Health, VHA Office of Community Care, and IHS' Deputy Director for Intergovernmental Affairs. Together, this team is responsible for implementing the MOU and overseeing the MOU workgroups. Leadership and workgroups collaborate on care coordination, reimbursement, workforce training, and cultural competency to:

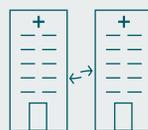

Increase access to care and services for AI/AN Veterans

Incorporate **electronic health records** to improve care

Facilitate health care **enrollment and navigation**

Improve access to care through **resource sharing**

## Partnership Accomplishments

In FY22, the VHA-IHS MOU leadership team focused on prescription services, transportation, housing services, workforce training, consultation with tribal communities, and reimbursement agreements for AI/AN Veteran care.

- 1 IHS Disparities Fact Sheet, April 2018: <https://www.ihs.gov/newsroom/factsheets/disparities/>
- 2 VA Veteran Population Projection Model, 2018: [https://www.va.gov/vetdata/veteran\\_population.asp](https://www.va.gov/vetdata/veteran_population.asp)

The workgroups completed several MOU-related activities, which are now a routine part of each department's operations, including:

**Workforce Training:** To better coordinate on training and recruitment efforts, VHA and IHS opened their training resources to each organization's staff. In FY22, they shared 423 training events focused on suicide prevention, substance abuse, opioid training, posttraumatic stress disorder, and more.

**Access to Care:** Since their inception in FY12, the VHA-IHS and VHA-THP reimbursement agreements provided \$185.95 million to IHS and THPs for care of nearly 15,000 VHA enrolled AI/AN Veterans. In FY22 alone, VHA paid IHS and THPs \$34.42 million for the care of nearly 7,000 unique enrolled AI/AN Veterans.

**Access to Medication:** In FY22, the VA Consolidated Mail Outpatient Pharmacy Program (CMOP) processed 972,179 prescriptions, an increase of more than 7% from FY19. Since its inception in FY10, CMOP processed more than 6.64 million prescriptions for VHA-IHS patients.

**Housing Assistance:** The Tribal Housing and Urban Development-Veterans Affairs Supportive Housing (HUD-VASH) program engaged 29 tribes to house 541 Veterans during FY22. There were 144 new unique Veterans admitted to Tribal HUD-VASH in FY22.

## Future Collaboration

In FY20, VHA and IHS drafted a new, updated MOU that reflects the evolving health care and health information technology landscape. VHA and IHS are consulting with tribes across America to ensure their concerns are addressed in this new MOU, which will create a more comprehensive, flexible structure that will support both agencies and the Veterans they serve well into the future.

As health needs change and new approaches to care emerge, VHA, IHS, and their tribal partners will continue to combine their expertise, resources, and efforts to help AI/AN Veterans thrive in rural communities.

The Office of Rural Health (ORH) works to see that America's Veterans thrive in rural communities. To support the health and well-being of rural Veterans, ORH and its Veterans Rural Health Resource Centers establish and disseminate initiatives that increase access to care for the 2.7 million rural Veterans enrolled in the U.S. Department of Veterans Affairs' health care system. Key focus areas include programs that address workforce shortages, transportation, primary care, mental health, telehealth, and specialty care.
